

# Hamilton Pacific

## Telecommunications

*Electronics and Security Solutions for the 21st Century*

Hamilton Pacific's telecommunications division offers structured cabling solutions at all levels, from single station expansions to inside and outside plant network architectures. Our focus is to deliver solutions that maximize true convergence and build on existing infrastructure investments.

Fiber Optics 

No matter the size or scope of your project, you can be confident with Hamilton Pacific. With bonding capabilities up to \$15M, our commitment to delivering as promised is unparalleled within the industry. Count on Hamilton Pacific to see your project through.

Voice 

Fiber Optic backbones, Local and Wide Area Network Systems, as well as phone systems, intercom and paging systems, are the focus of our capabilities. Our goal is to assist businesses to evolve to future technologies while minimizing installation costs.

Data 

With offices throughout the United States, Hamilton Pacific services any size organization - single site operations to large multi-state institutions.
